### JINGLE BELLS STOCKING

Many of you have probably made a stocking or two in your sewing adventures, but how about this cute cuff idea? It could be used as trim around a pillow-case or maybe even layered between borders in place of something like prairie points. The possibilities are endless, and I hope you'll adapt it to a project of your own! Until then, I'll show you how to make this stocking.

1. Print out the stocking pieces template at the end of this PDF. You will need to tile the pages and piece them together.

2. I sewed two mirror image stocking pieces to batting with simple straight lines for the front and back of my stocking. I used fusible web to attach the toe and heel pieces (cut out of shimmery gold fabric) to the front of the stocking and stitched down the edge with a straight stitch (you could also do satin stitch here). If you want a refresher tutorial on this method, see my "Fusible Applique technique" tutorial on my website.

3. Next, I cut a piece of the shimmery gold fabric for the cuff (this is a knit fabric about 9" x 18") and pressed fusible interfacing to the back side of it; then cut it into two strips at 4" x 17".

4. I marked the center of the top strip and then every two inches in either direction leaving the last half inch on each end for the seam allowance. Using the PDF template or a round glass vase like I did, mark a curve between each of the spacer lines.

5. Pin everything in place and sew along the curved line pivoting at each point as you go.

6. Clip out the curves leaving an  $\frac{1}{8}$ " seam allowance. Turn the cuff right side out, and poke out each point with a pokey tool like this bamboo one.

7. Lay the two sides of the stocking together, and sew the inside seam from the top down, about 6". Press this seam open.

8. Center the cuff along the top edge, and pin in place. Sew it down with a  $\frac{1}{4}$ " seam allowance.

9. Fold the two sides of the stocking together, and pin all the way around. Start at the partial seam end and finish stitching the rest of the stocking leaving the top edge open

10. You see the unfinished ends of the cuff are stitched into the side seam of the stocking.

12. Put the outer stocking into the lining with the two sides facing each other right sides together.

11. Cut two stocking pieces out of lining fabric. Stitch these together leaving a 3"- 4" opening at the bottom for turning the stocking.

13. Now, I'm going to teach you a handy trick! Take 8 -10 lengths of thread about 25" long. Feed them as one through a hole in an empty bobbin. Put the bobbin on your machines winder and hold both ends of your thread bundle straight up as you "wind" the bobbin. Once the thread gets really twisted, you can double it over and it will twist against itself to create a little rope. Pinch it at the bottom as you cut it off the bobbin, and tie the end in a knot to keep it from unwinding.

14. You can make any color hanging rope with whatever thread you are using in the piecing. Perfect match!

15. Create a loop with your thread rope and tuck it in between the lining and cuff at the outside seam. Pin the top edge in place, and sew it all the way around with a  $\frac{3}{8}$ " of an inch seam.

16. Pull the stocking right side out through the hole in the bottom of the lining, sew this hole closed and tuck the lining back down into the stocking. Give the loop a little tug and you're set!

17. I decided to add some little bells to the ends of each point. You might not want to trim your pillowcase with bells, but it sure adds the perfect touch here.

Merry Christmas!
