## CUTTING INSTRUCTIONS

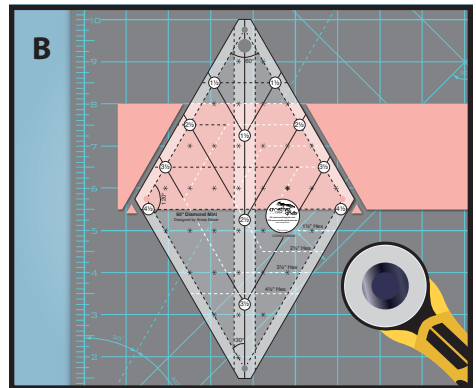

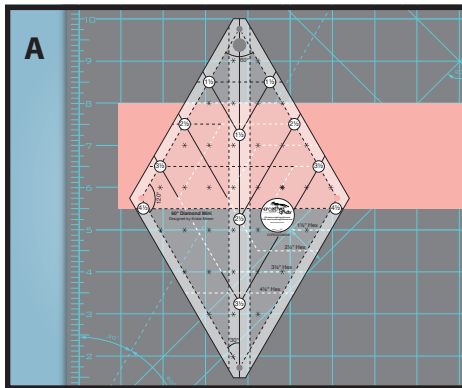

All strips are cut selvage to selvage or 42" long unless otherwise marked.

From each of the 7 different fabrics, cut:

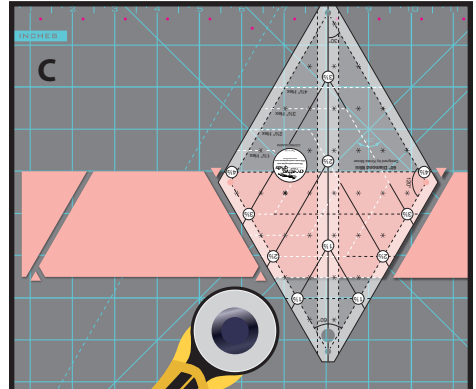

- Lap Size - seven 2½" strips
- Twin Size - fourteen 2½" strips
- Queen Size - twenty-one 2½" strips

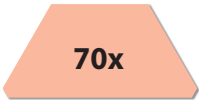

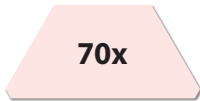

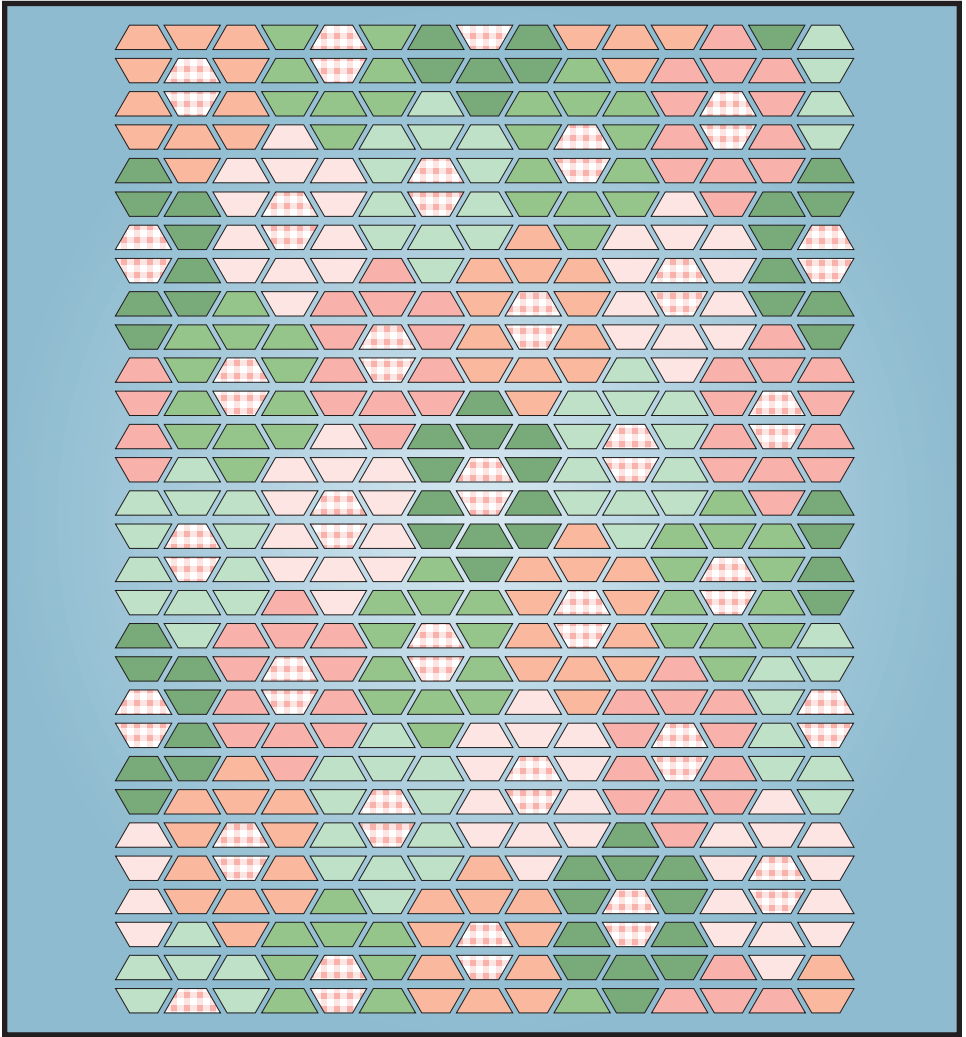

## CUTTING THE TRAPAZOIDS

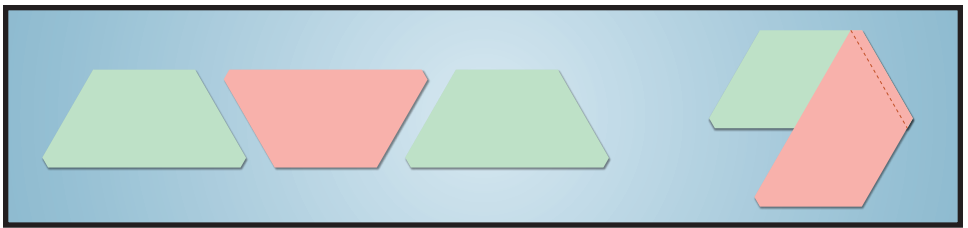

1. Open the strips to a single layer, press the crease out of the middle, and cut ten 4½" trapezoids from each strip. Using the triangle lines on the ruler, align the 4½" line with the bottom edge of the strip and the 2" dashed white line with the top edge (A). Cut on both sides of the ruler. Be sure to notch off the two outside corners as well (B). Rotate the ruler 180° to make the next cut (C).

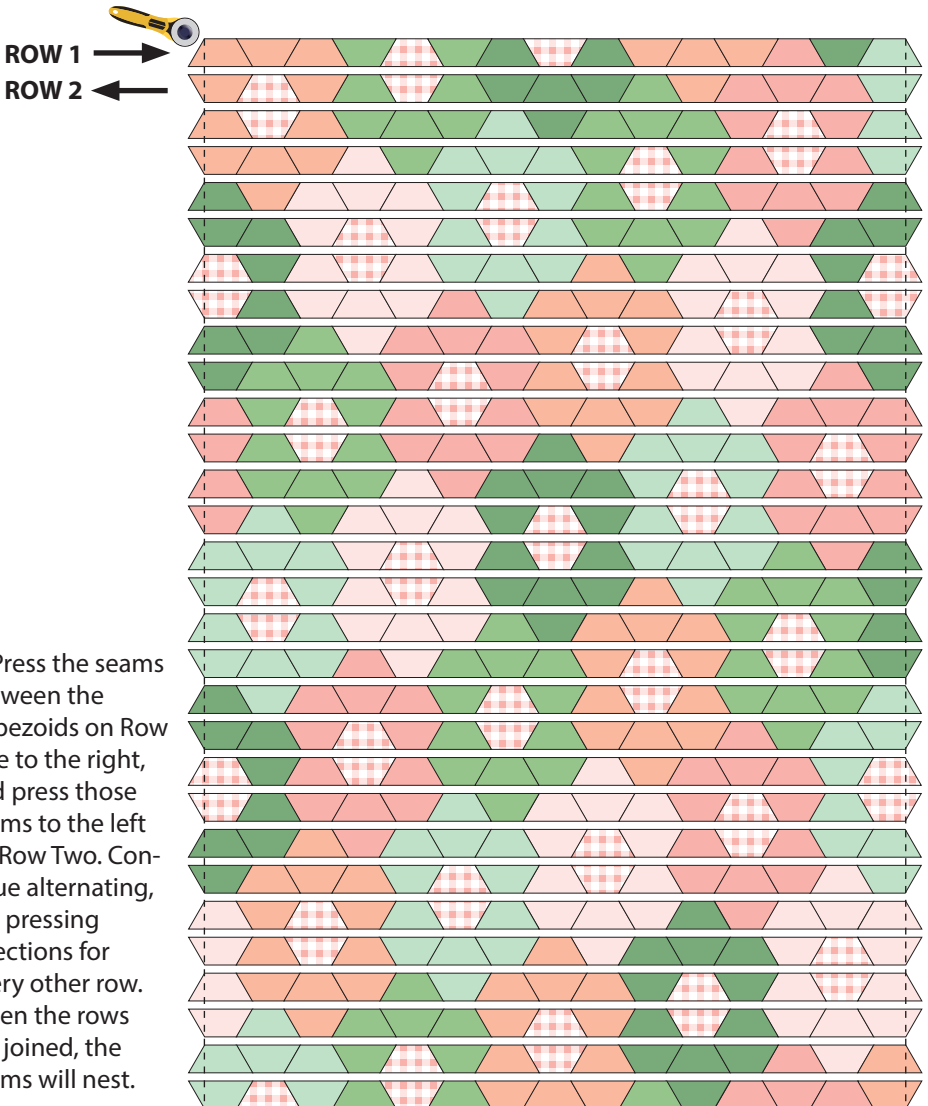

# ASSEMBLY

2. Lay out all your trapezoids in rows following the colored diagram for your chosen size. You can move the flower colors around however you choose, but you only have 70 (140, 210) trapezoids of each color to work with. There will be a few extra trapezoids in each color.

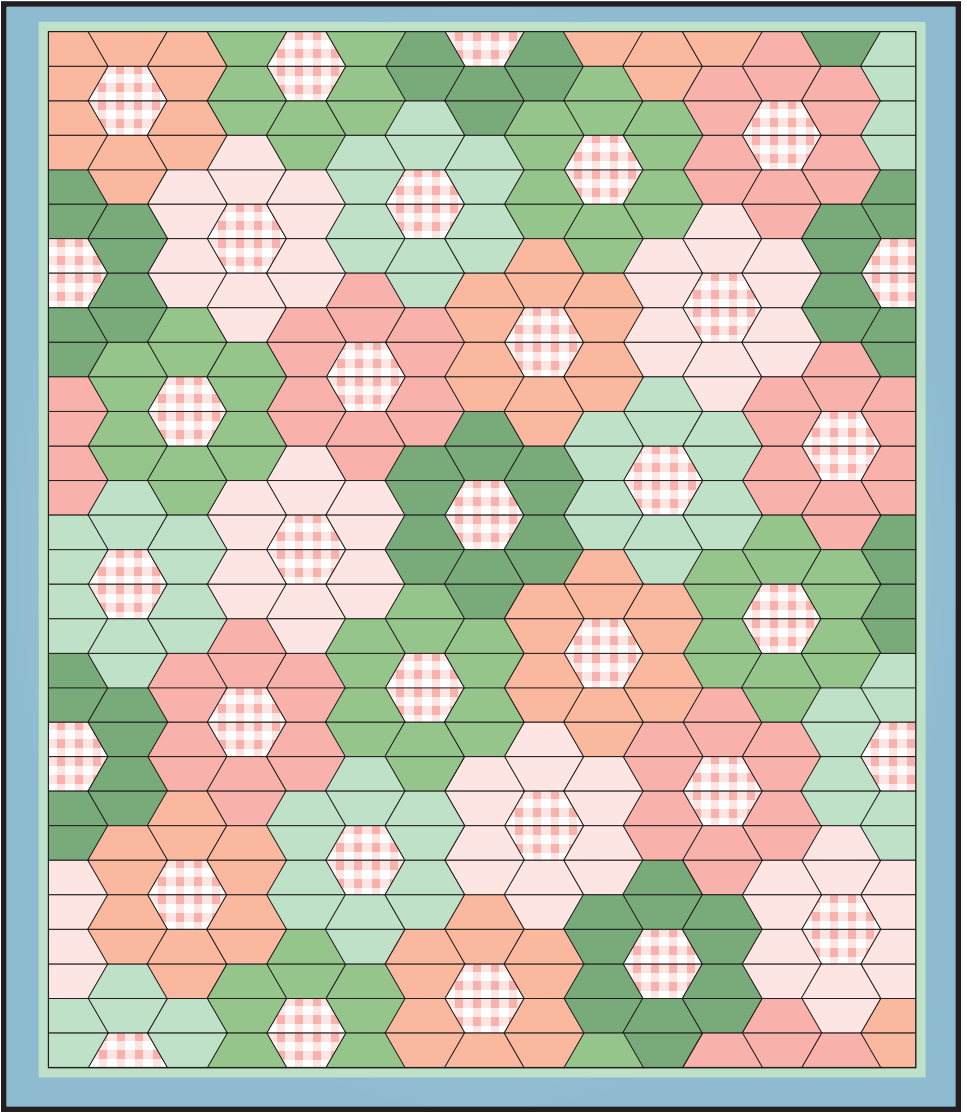

**3.** Take the trapezoids from each row and join them together as shown. The flat tips of the trapezoid help to line up each piece.

**4.** Press the seams between the trapezoids on Row One to the right, and press those seams to the left on Row Two. Continue alternating, the pressing directions for every other row. When the rows are joined, the seams will nest.

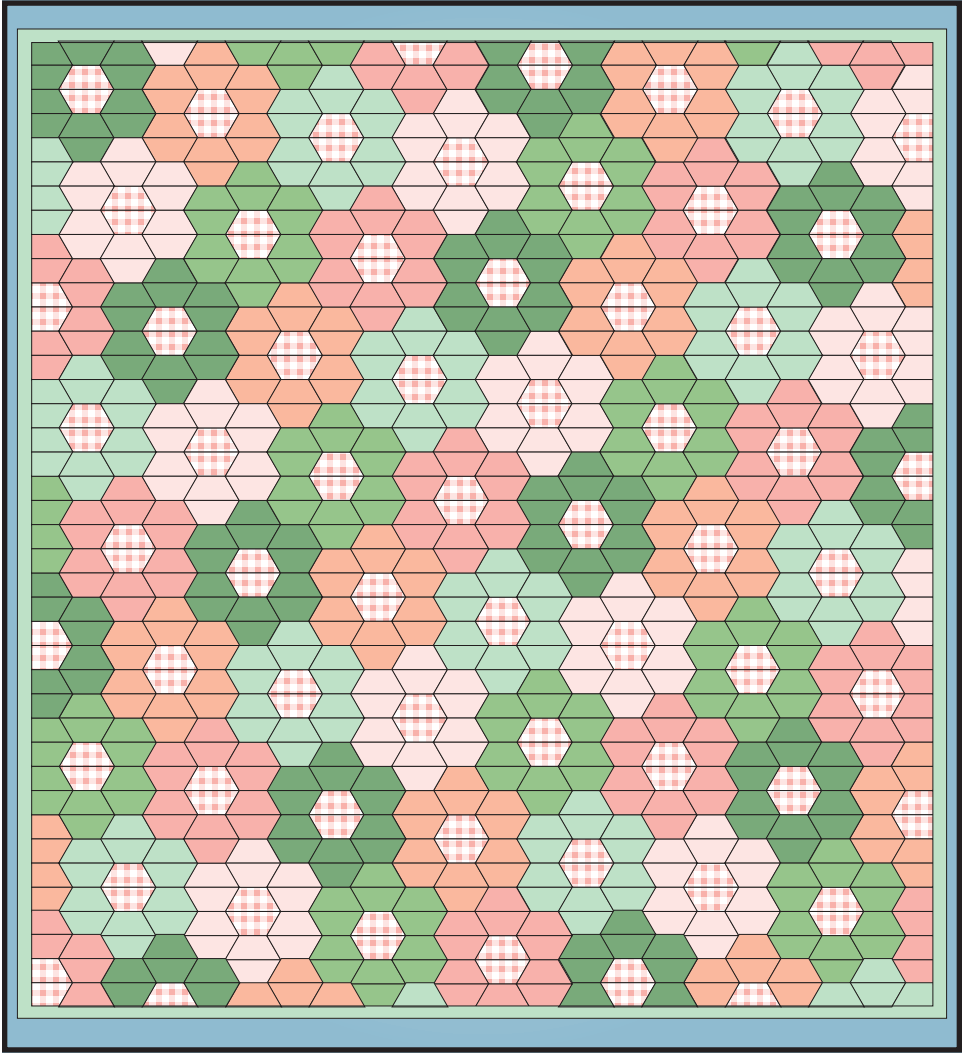

## 50" x 60" LAP SIZE LAYOUT

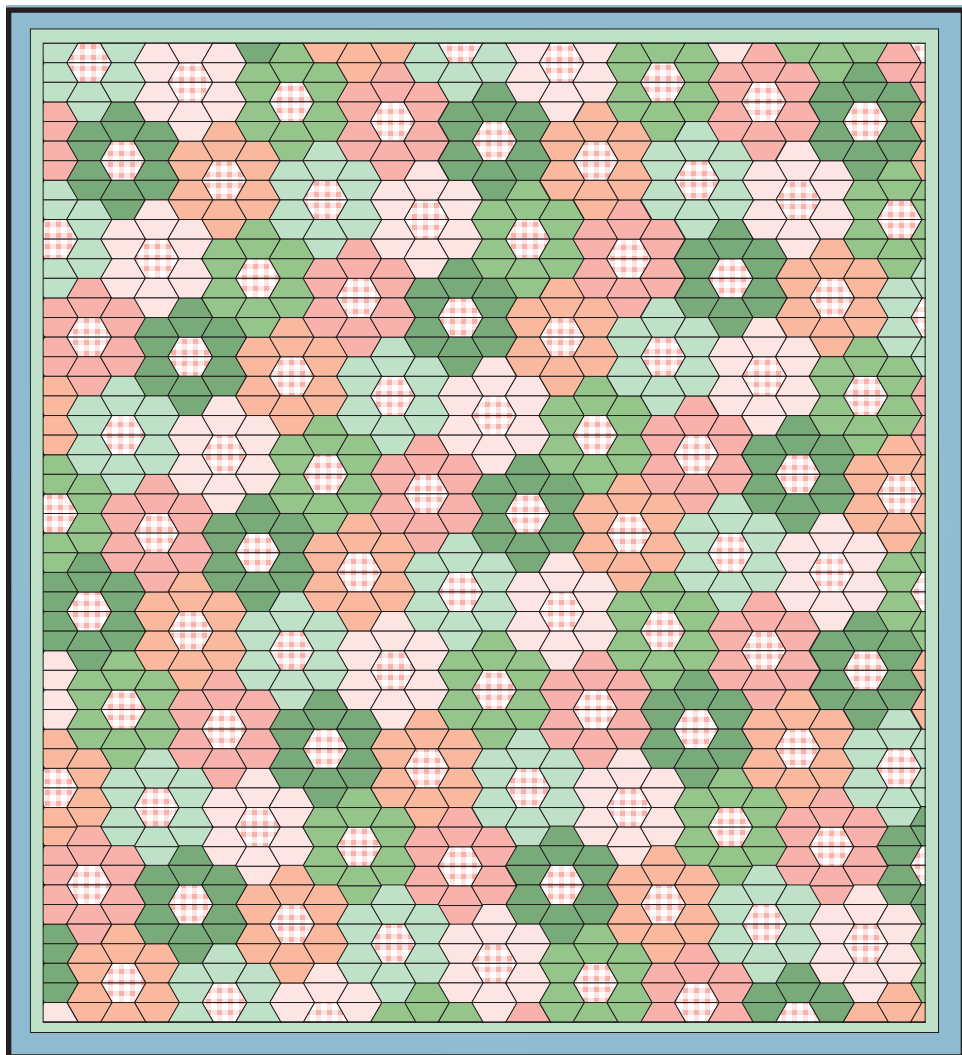

**5.** Once the rows are all joined to each other, trim the right and left edges off straight. You may want to wait until after quilting to ensure no warping or distortion of the edge.
